## EXPERIENCE

### **Saturno Design 3/22-Present**

Web and Product Developer

Set up DB objects and code front end designs and connect the two. Edit existing client sites. Wordpress, Shopify and hybrid sites.

### **Arize 10/21 - 3/22**

WordPress Developer

Create and customize pages, new features and widgets in WordPress

### **Apple 3/21-10/21**

Front End Developer

Convert sketches into reusable templates for internal Drupal tool.

**Zuora 1/21-3/21**

Developer

Created one page layouts for events and careers site in Wordpress using Elementor and custom JS.

**ASML 11/19-3/20**

Front End Developer

Work with local and international team to develop a React application for scheduling high pressure maintenance on multimillion dollar equipment. Duties included refactoring legacy code, implementing new features, writing tests and developing manual testing documentation.

**Aeolidia 5/19-11/19**

Shopify/Wordpress/E-Commerce Developer

Develop customized Shopify, WordPress and all associated applications for new and existing storefronts and other sales tools. Edit HTML/CSS/Javascript/Liquid/PHP to match design comps. Work closely with the client to analyze their needs and develop a unique plan to increase sales with improved aesthetics and analytics. Optimize their front and back end for improved SEO, reduced loading times and better customer experience.

**Freelance Interactive Designer 1/12-Present**

- Designed and programmed tablet UI for interactive LED lights on a 20' x 10' model landscape with 140 addressable buildings, and an additional 63' wall and monitor display using TouchDesigner
- Programmed interactive shout out board that allowed attendees to write notes that were then animated onto a large projection wall for Nike market conference
- Programmed animated LED display for Dyson showroom
- Designed and programmed an air compressor synced with video for window displays in NikeTown stores in New York, Las Vegas and Portland.
- Designed and programmed HTML/CSS/Javascript touch screen kiosk display for Intel developer tradeshow
- Designed and programmed a Raspberry Pi PHP server to control a lighting system that included a ringing bell for ZGF Architects for use in the main headquarters of Grocery Outlet
- Created a projection mapped video for Nike Emerging Markets event.
- Optimized ActionScript and art assets for Flash golf game for Washington Lottery
- Created minimized Flash ads for NBA merchandise store
- Created prototypes for Teyana Taylor Adidas shoe website
- Created an internal interface that loaded in tweets with #justinbieberphotobomb so a team of artists could manually add Justin Bieber, send it for approval and finally post it as a response to original tweet
- Designed and coded layout facebook layout for Adidas photoboos in Germany
- Worked as Front End developer for local startups Threadalong and theBlurbz.
- Programmed interactive lighting display for Oregon State Hospital using an a thermal camera connected to an Arduino controlling a room full of LEDs.

**Cura 11/18-2/19**

Web Developer

Responsible for updating and maintaining 3 main company websites and handling all web related business. Cleaned, upgraded and optimized out of date WordPress installations. Worked with the design team to ensure that layouts were both usable and beautiful. Customized and maintained Shopify

storefront that averaged very high sales per month. Coded full responsive redesign of selectoil.com. Created marketing emails and one off sites for promotions. Integrated SEO, analytics and other affiliate tracking systems.

### **Banfield Pet Hospital 11/14-8/18**

UI/UX Developer

Created wireframes and prototypes for a ground up redesign of existing hospital software responsible for handling patient and client information, medical records, diagnosis feedback and scheduling for over 900 hospitals. Created, maintained and enforced style guide. Designed and built layouts for mobile learning apps and created prototypes for future mobile apps. Won hackathon award for mobile chat app.

### **Precash 11/13-11/14**

QA Engineer/UI Engineer

Originally hired as a QA Engineer responsible for writing automated and manual tests for online bill pay app. Promoted to UI Engineer to code HTML/CSS/Javascript templates for GWT framework, implement web standards and direct design flow.

### **Happy Lucky 7/13-12/13**

UI/UX Developer

Work with the Platform, Application and the Media teams to design, build, test, and assist in the deployment and maintenance of software applications. Created Facebook app to display images taken in photo booths across Germany. Created a simple CMS to collect images from a Twitter hashtag that allowed a team of photoshop artists to quickly edit and republish them for a Justin Bieber promotion.

### **FashionBuddha 12/12-5/13**

Interactive Developer

Created 15+ dynamically generated, scalable action and puzzle games in Javascript with a bridge to interact with iOS application.

### **BizBuilt 12/10-12/12**

UX Developer

Founding team member of business networking site with large user base. Hired as contractor coding core layouts in HTML/CSS/Javascript and animating tutorial videos. Promoted to UX Developer in charge of proposing and implementing new features, refining existing ones and writing tests. Assisted in transition to AngularJS.

### **Prokarma 3/11-8/11**

Front end consultant

Analyzed client site to find improvements in page rendering times, asset consolidation, server load by over 80%. Oversaw a small offshore team. Rewrote and simplified stylesheets and javascript. Reported and fixed bugs.

### **Angelvision 8/09-2/11**

Flash Developer

Worked directly with clients to create 3-4 minute interactive marketing animations in Flash, from script to finished product. For use on websites, media packages and interactive kiosks.

**Providence Health Plans 6/09-6/10**

UI/UX Developer

Coded layouts from Photoshop mock ups and refactored existing web templates for national hospital provider directory.

**DesignWise/Happy Trails Animation 6/06-6/09**

Web/Flash Developer and Animator

Handled all web design and coding for print design shop. Translated print materials into functional websites for many local companies. Created promotional interactive Flash sites and materials. Coded AS3 based political games. Animated pre-existing artwork including paintings and comic book art.
